FOR RELEASE ON JANUARY 7, 2015

Yorktel Earns ISO 27001 Certification for Cloud and Managed Services

Eatontown, NJ (January 7, 2015) – [Yorktel \(@Yorktelcorp\)](#), the worldwide leader in unified communications and collaboration (UC&C), cloud, and video managed services, is pleased to announce that it has obtained ISO 27001 certification of its information security management system (ISMS), supporting and provisioning Yorktel’s 24x7 Managed and Cloud Service to its customers, as well as prevailing managed information technology services best practices including people, processes, and facilities services.

“ISO 27001 certification is essential for cloud and managed services provider partners whose enterprises clientele must mitigate risk in every way possible. This achievement assures our customers with the highest level third-party validation of Yorktel’s security protocols from strategic planning to day-to-day operations, and proven ability to trust that their vital information is being held in a secure, properly managed environment,” said Yorktel Vice President of Engineering and Chief Information Security Officer, Frankie Escribano.

A globally recognized standard for the establishment and certification of an information security management system (ISMS), ISO 27001 specifies the requirements for establishing, implementing, operating, monitoring, reviewing, maintaining and improving a documented ISMS within the context of the organization’s overall business risks. It sets forth a risk-based approach that focuses on adequate and proportionate security controls that protect information assets and give confidence to interested parties.

The certification was performed by Brightline, an ANSI-ASQ National Accreditation Board (ANAB) accredited Certification Body based in the United States. The details of our ISMS certification are publicly available at <https://www.brightline.com/certificate-directory/4bKp7RI1c7j8/>.

For 30 years, Yorktel has empowered customers to realize the full potential of next-generation unified communications, video conferencing, media services, visual communications and collaboration. With leading capabilities in video and UC integration, end-to-end video management, technology selection, and ITIL-based

processes, Yorktel is the preferred choice for large enterprise and federal government cloud and video managed services.

ABOUT YORKTEL

Yorktel is a leading global provider of UC&C, cloud, and video managed services for large enterprise and federal government customers. Founded in 1985 and headquartered in New Jersey, with offices across the US, UK, and France, Yorktel enables customers to successfully integrate video into their operations – from video conferencing to video event production; on premise or in the cloud. Yorktel designs, integrates, and manages enterprise-wide unified communications solutions.
